

Auto-Associative Networks

An Auto-Associative Feed Forward Network is a neural network that learns to reproduce the same input pattern at its output.

Working:

- Input pattern is given to the network.
- The network stores the pattern.
- When a noisy pattern is presented, it reproduces the original.

Auto-Associative Networks

An Auto-Associative Feed Forward Network is a neural network that learns to reproduce the same input pattern at its output.

Working:

- Input pattern is given to the network.
- The network stores the pattern.
- When a noisy pattern is presented, it reproduces the original.
